chaired a Narcotics Intelligence Panel together with Special Assistant to the DDD for Narcotics, and John Warner, Special Assistant to the Chief, Office of Intelligence, DEA. The discussion included a review of intelligence production and progress over the past year as well as a description of the role of the CIPC in developing a long-range study for supporting the US narcotics control effort. The Attorney General attended this review and had several questions bearing on the relationship between the Intelligence Community and the law enforcement organizations.  CIPC China Working Group:  Written responses commenting on the proposed additions to the CIPC-approved TOR were received from all working group (WG) representatives except CIA, which was gisted telephonically.  Amalgamation of these responses into an amended TOR has been completed by the working group chairman and the CIPC project officer. The WG will meet on 21 October to consider the revised proposals. The product of this session will be passed forward to the CIPC for its consideration.  Other matters to be addressed at this second meeting are revisions to the draft outline that has been circulated for comment and the delegation of analytic responsibilities within the WG.  CEW Future Monitoring Capabilities:  completed drafting of a discussion paper addressing the potential contribution of establishing a new working group on this subject. The discussion paper, which recommends proceeding to draft a TOR to support a proposal by the C/CIPC to the principals to form such a group, will be used to elicit comments from the substantive specialists in CBW matters within the Community concerning the form and content of those terms of reference.  Soviet Civil Unrest:  In response to Stan Moskowitz's request for a review of the collection requirements on Soviet civil unrest, has contacted the HUMINT and SIGINT committees, COMIREX, the Chairman, DCID 1/2 Committee, as well as a DIX.
